Examples of how Proximity Limits Could Work in High Density Residential Areas
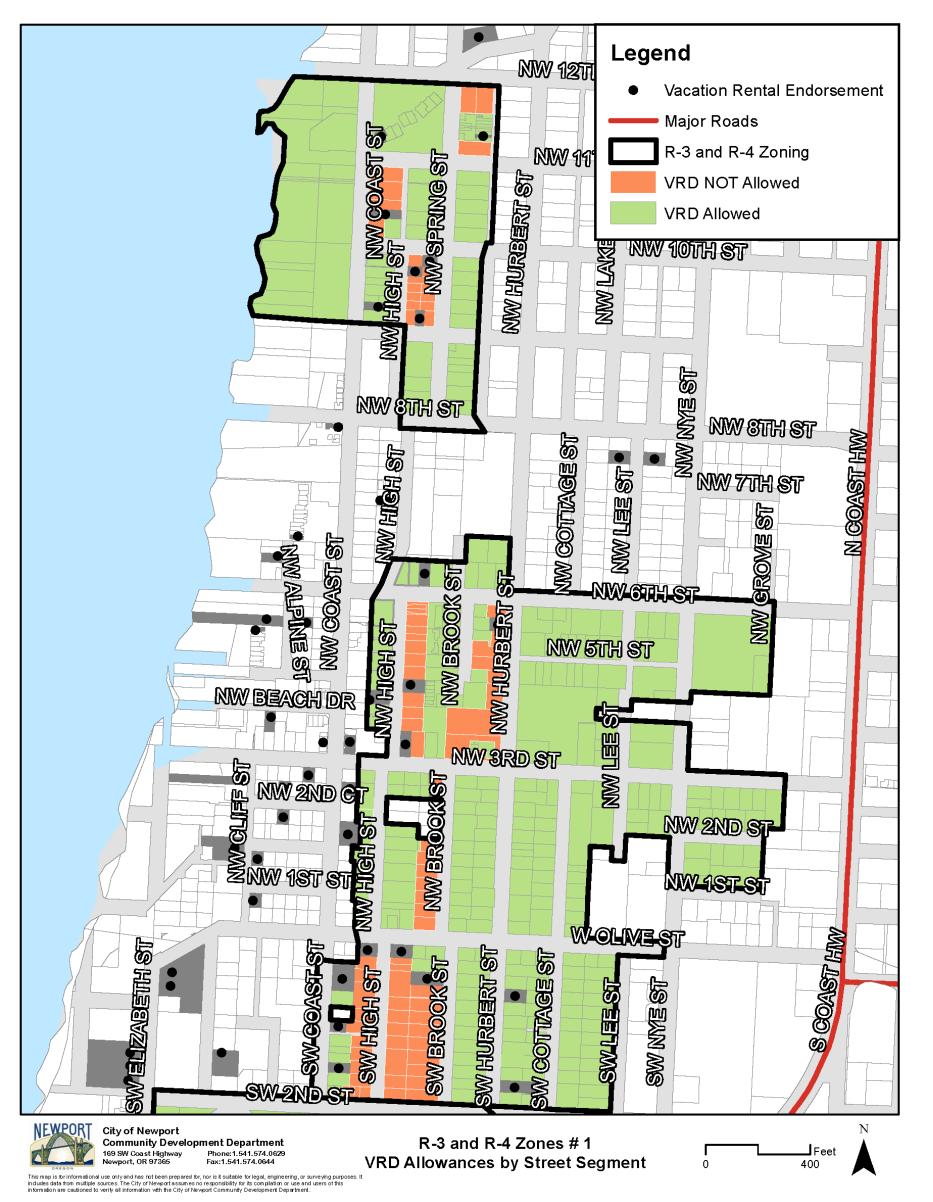

(Proximity Limits would not Apply Internal to a Multi-Family Building)
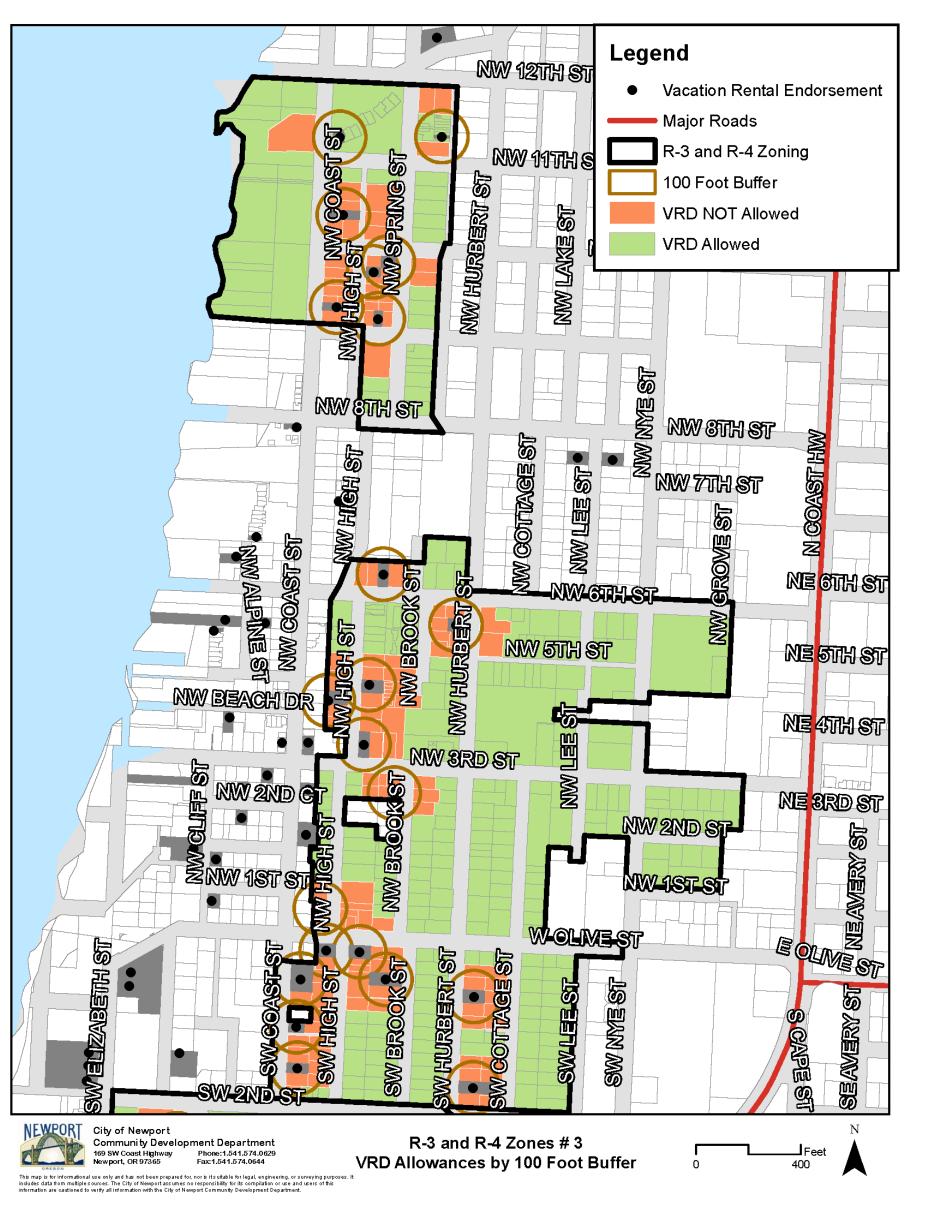

What is a Street Segment?

A portion of a street located between two intersections, or an intersection and the end of a dead-end or cul-de-sac street (see blue lines in image)
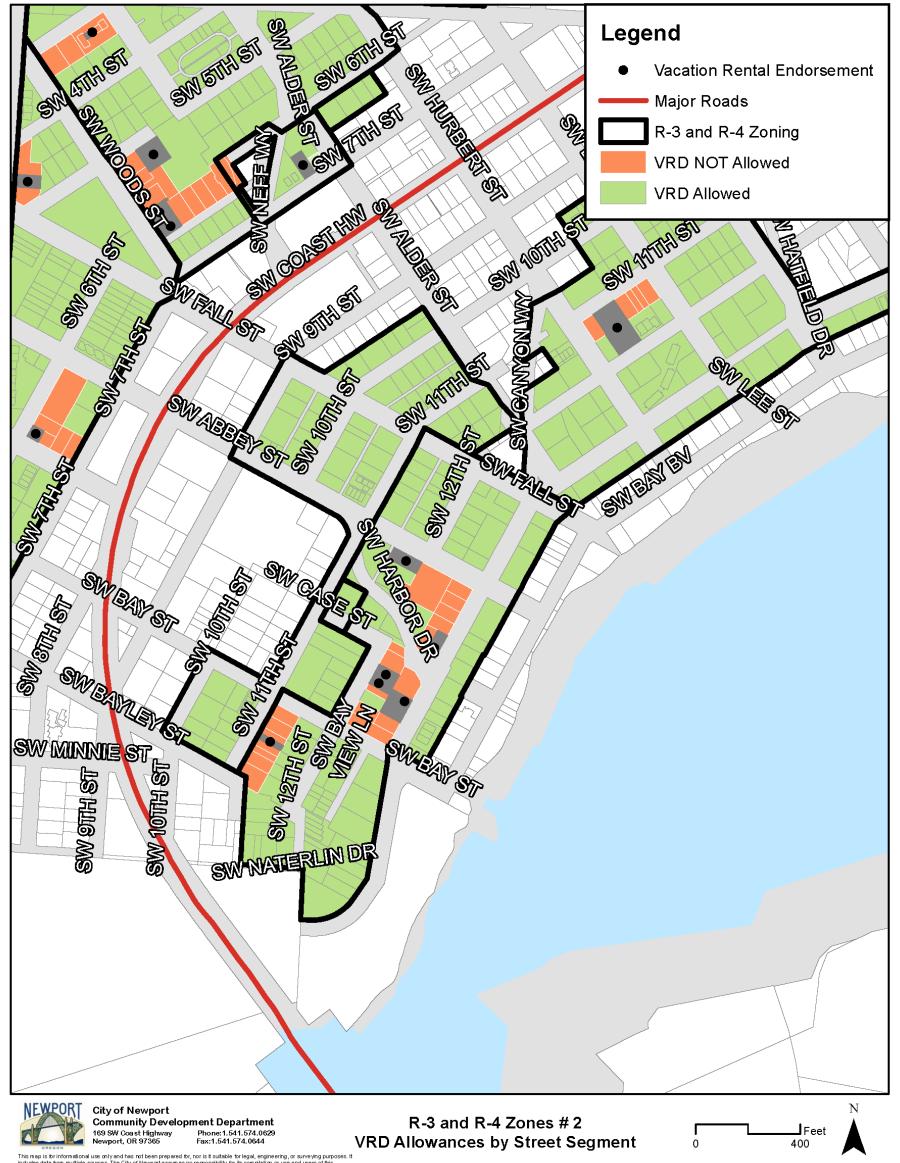

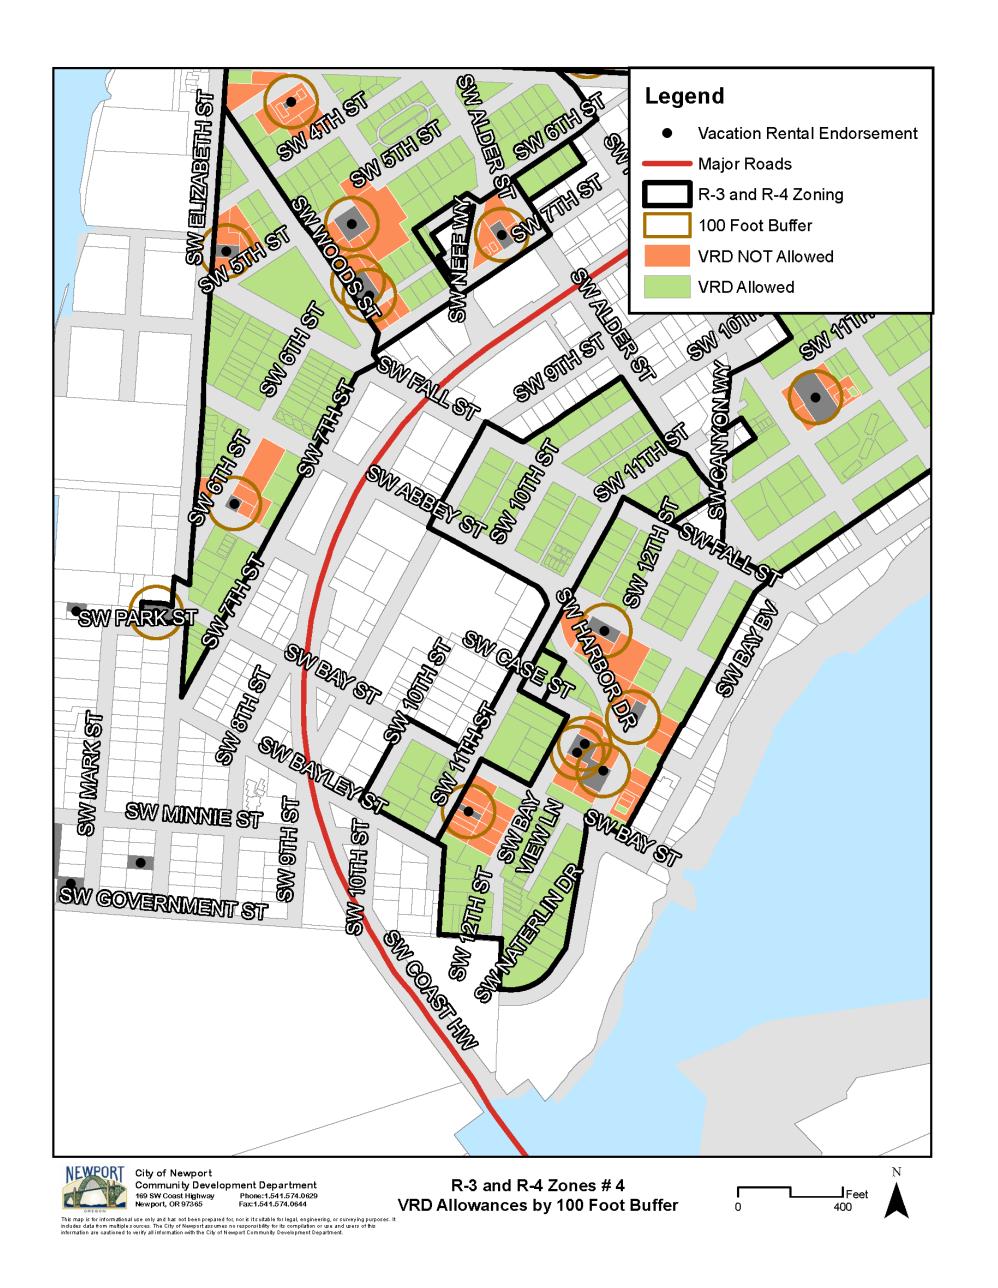

Limitation of One Multi-Family or Single Family Building in VRD Use on each Side of a Street Segment

100-foot Buffer Between Multi-Family or Single Family Buildings Used as VRDs
